## Food, Cannabis, Dietary Supplements and ISO 17025

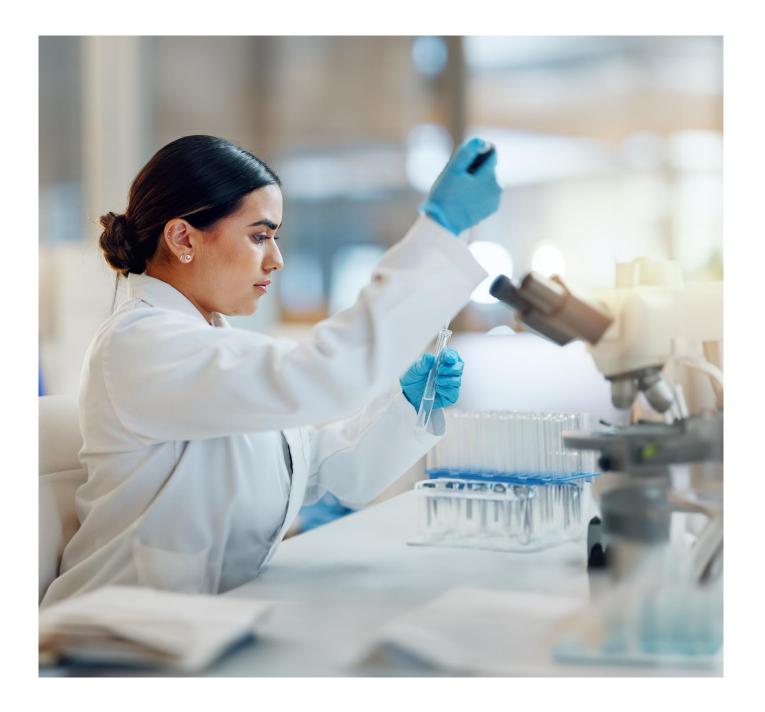

For food manufacturers, 17025 accredited testing is often the first requirement to bring product to market.

- Consumer safety!
- FSMA
- Lack of conformity in state/regulatory agencies

Ensure products are being tested using scientifically sound, validated test methods that are appropriate (fit for use) to the product being tested.

- Complications of sample matrix

## Similarities between Food/Cannabis/Dietary Supplements testing

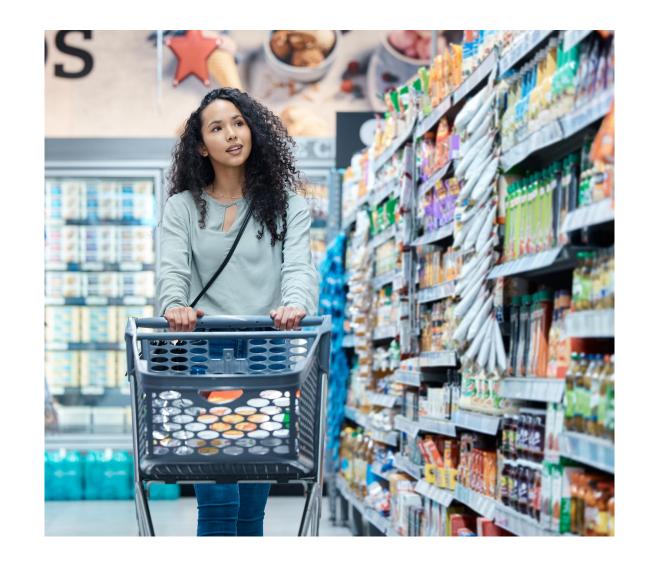

- Matrix concerns and challenges
- AOAC Guidelines (covers all 3)
- Regulatory/stakeholder involvement and enforcement. (States for Cannabis & food; FDA for food and/or dietary supplements)
- Consumer Safety!

## Validity of Results – confidence in the marketplace

- Laboratory has a well-established quality system and practices.
- Method validations/verifications
- Equipment: qualification, verification, and calibration.
- Technical competency
- QA/QC
- Interlaboratory comparisons (PT)

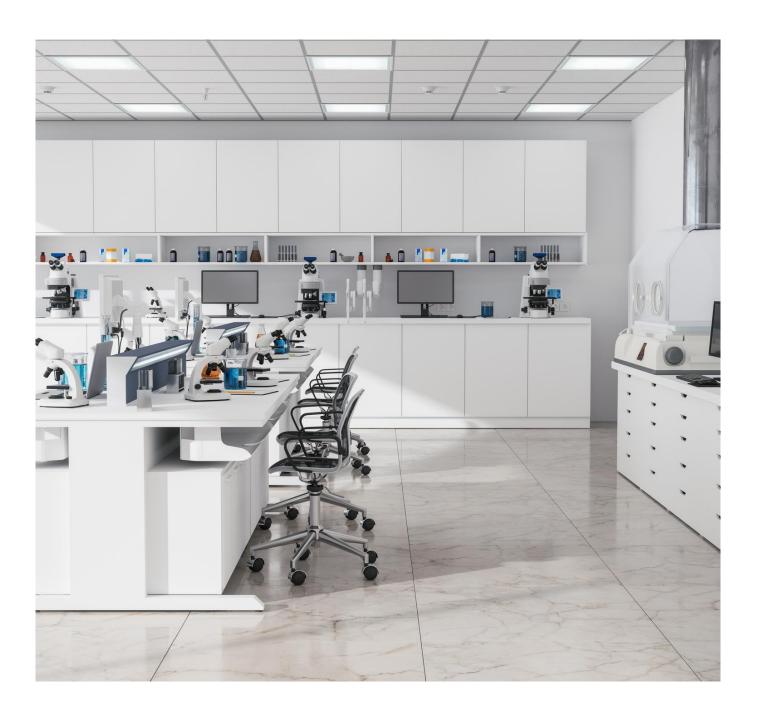

In addition to ISO 17025, ABs offer specialized requirements to meet industry/regulatory needs.

- AOAC (Food, Cannabis, Dietary Supplements and Pharmaceuticals) – MI CRA and Cannabis/Hemp program
- ACIL Guidelines for Cannabis Testing
- AAFCO (Animal and Pet feed)
- GRMA (Dietary Supplements)
- ACIL Guidelines for Dietary Supplements
- FDA LAAF (Laboratory Accreditation for the Analysis of Foods)

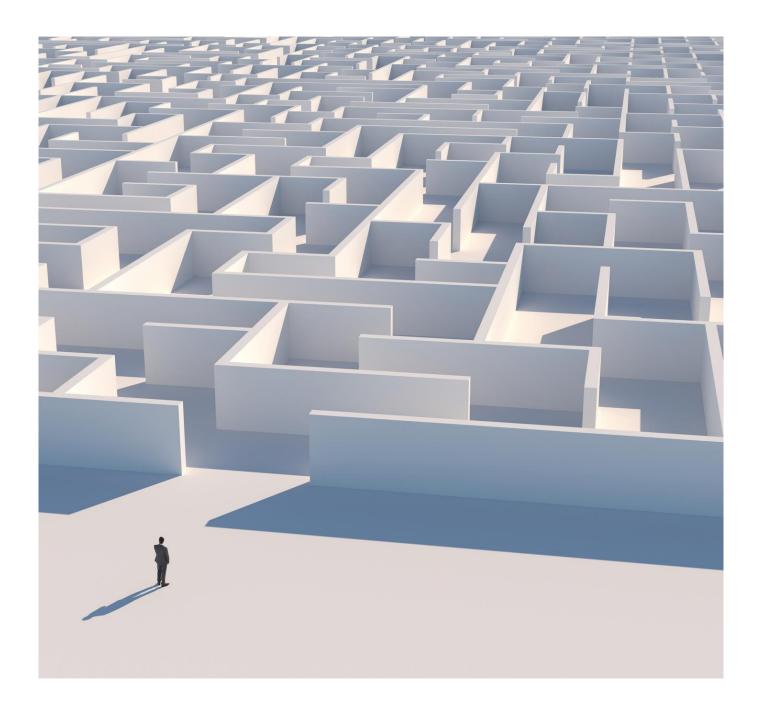

#### LAB SHOPPING

Cannabis
Regulatory
Landscape:
A Snapshot in
Time

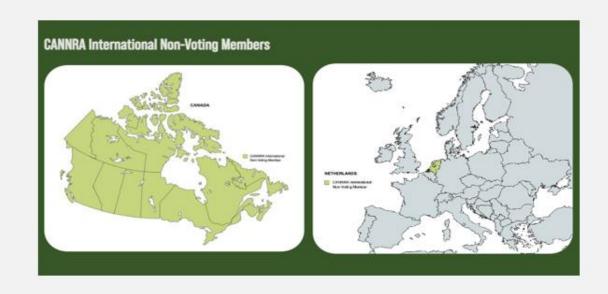

## CANNABIS REGULATORS ASSOCIATION (CANNRA)

Our mission is to convene, educate, and support governmental jurisdictions responsible for implementing cannabis and cannabinoid policies and regulations. We do this by fostering collaboration and coordination to identify and share best practices that safeguard public health and consumer safety, promote equity, and create regulatory certainty for industry participants.

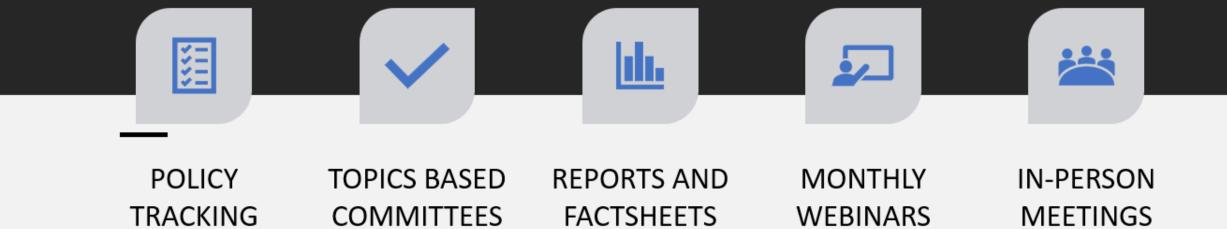

#### Members:

- 45 States and US Territories
- Canada
- The Netherlands

#### **CANNRA'S WORK**

## CANNRA Lab Testing and Product Safety Subcommittee

#### **SUBCOMMITTEE MEMBERS:**

127 MEMBERS
36 STATES, CANADA, THE NETHERLANDS

#### **WORKING GROUPS:**

TECHNICAL CALLS

WEBINARS

POLICY/TESTING TRACKER

TESTING STANDARDIZATION (LEGACY)

#### **EXAMLES OF OUTREACH:**

AOAC

USP

**ASTM** 

ISO ACCREDITING BODIES

Additional Challenges to Cannabis Innovation

#### The Pace of the Industry

• Lab Testing Standardization remains a challenge, but states are effectively moving forward

Increased use of non-cannabis additives in products

#### Lack of data

- Shelf stability and expiration dating
- Safety thresholds for contaminants based on modes of consumption

Inability for state regulators to test products in a reference lab environment

Pace of industry (slow)

- Lack of standard test methods
- ISO 17025 Accreditation
- State Certification/Accreditation

Development

- AOAC SMPRs & Test Methods
- ASTM test methods

Continued Advances

- ALACC Guidelines
- ACIL Guide

Pace of industry (fast)

 New product type, formulation, manufacturing process/practice

Regulatory restrictions

- Limit solvents
- Limit decontamination or remediation techniques

Don't stifle improvement!

Process to modify restrictions

#### Good Manufacturing Practices

### Food?

21 CFR 117

Hazard prevention & Risk-based preventive controls

 Prevent contamination and ensure food is safe to eat

## Drug?

21 CFR 210 & 211

Master production & control records

Batch production & control records Laboratory records.

**Process Validation** 

 Assure identity, strength, quality and purity of drug

## Dietary Supplement?

21 CFR 111

Process controls:

Manufacturing

Packaging

Labeling

- Ensure quality (consistent outcome)
- Free from contamination
- Label accuracy

January 1, 2021 All business types CAPA Audited products Specific • Master formulation records requirements • Batch manufacturing records for certain • Ingredient quality specifications products • Third-party audit • July 1, 2024 • RTA microbial testing – cultivation HACCP • ASTM D8250-19

#### Additives

- Terpenes
- Vape diluents
- Herbal supplements

Monitor & Research

- No VEA/MCT oil
- Voluntary removal

Regulatory action

- Reg update
- Product recall
- Adverse health event reporting

• Expiration date

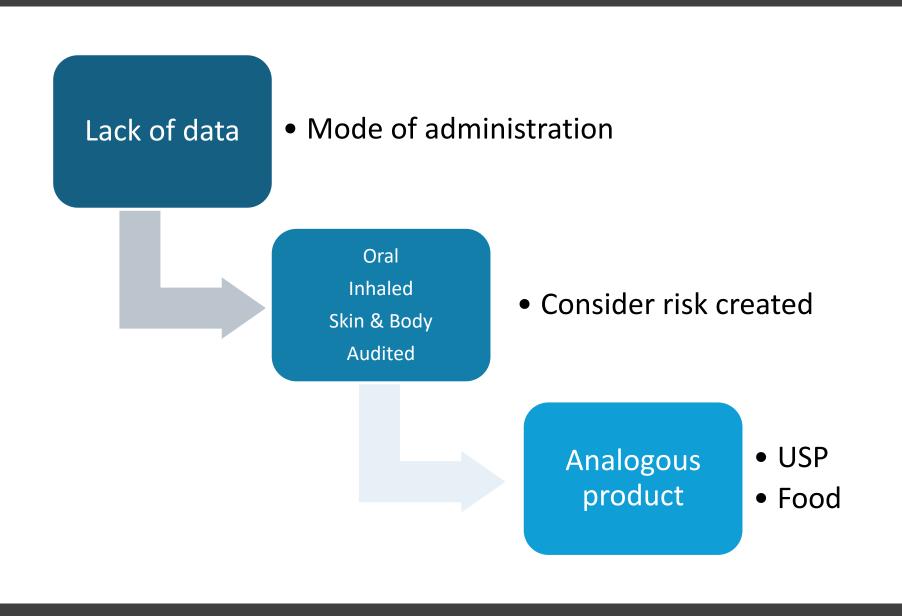

Lack of Data

## Expiration date

Vaporizer devices

- Arbitrary 9 months, or;
- Testing determined

Use by date

• Lack of reference lab

**Testing** 

#### Create Lab

- Within regulatory agency
- Existing heath or ag

- Contract w/independent lab
- Require licensee to submit samples

Alternatives

# Industry Perspective Kathy Knutson, Ph.D.

Kathy Knutson Food Safety Consulting LLC Food Safety Summit 2024 Rosemont, IL

## Working In the Cannabis Industry

- Personal journey as a food microbiologist and patient
  - There will always be opportunities in the cannabis industry.
- My field trips
  - Wisconsin product sold in a Missouri cannabis boutique
  - Georgia first state to allow cannabis sales in pharmacies
- Qualifying medical condition
  - Texas (2024), n = 9 + medical research
  - Florida, n = 10 + terminal condition + chronic nonmalignant pain
  - Oklahoma, no specific qualifying conditions

#### Professional Associations to Watch

#### **CANNRA**

National Cannabis Industry Association

#### **ASTM International D37 Cannabis Committee**

- 2023 International symbol
- 2024 Draft GMP standard
- 2024 Workshop on sensory analysis of cannabis
- 2024 Working group on sanitation

### What is the FDA doing?

- Center for Drug Evaluation and Research (CDER)
  - Norman Birenbaum, Senior Public Health Advisor
  - Pathway for pharmaceutical drugs
- Center for Food Safety and Applied Nutrition (CFSAN)
  - CBD and THC are not dietary supplements
  - CBD and THC are not approved food additives
- An Act of Congress

## Hemp Derivatives and Isomers: Exploitation of an Unintended Loophole

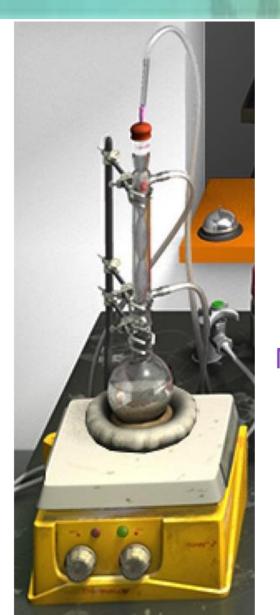

**Christopher Hudalla PhD** 

**ProVerde Laboratories – Milford, MA** 

### Conversion of CBD into THC

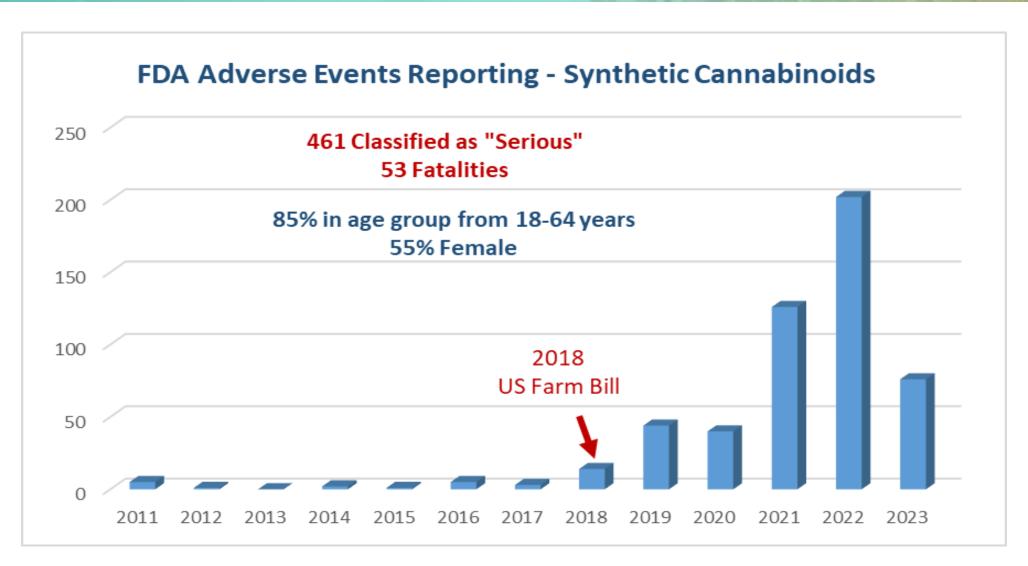

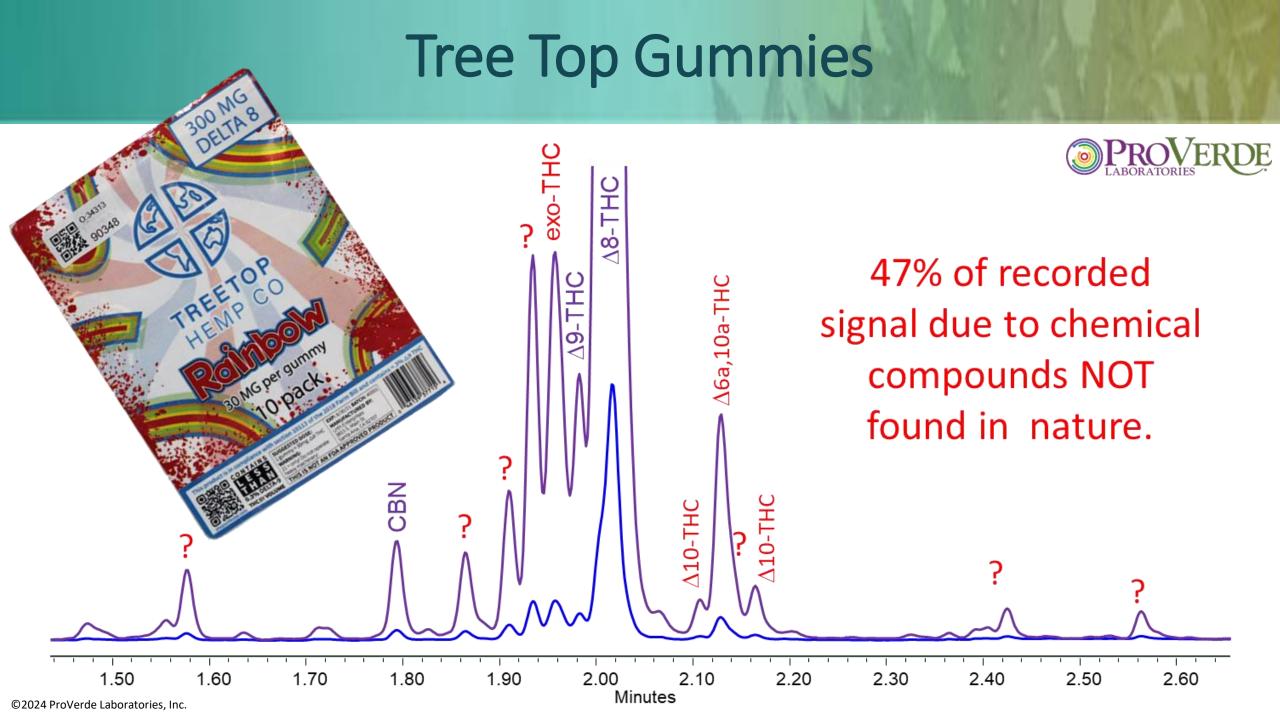

# What Is the Safety of Cannabinoids?

- Cannabis
  - Entourage effect
  - Isolates
- Hemp
  - 2018 USDA Farm bill
  - Hemp-derived compounds
- Unknown synthetic compounds

### Regulatory and Consumer Safety Groups

#### **Positive Notes**

- SOPs, GMPs, QMS, HACCP, PCQIs
- The majority of citizens want federal legalization.
  - The federal government must write and pass legislation.
- Lab method development
- Proficiency testing programs
- Sensory analysis and stability testing
- Creative, entrepreneurial spirit

## What questions do you have? Our Speakers:

- Lori Dodson
  - Lori.dodson1@maryland.gov
- Heather Krug
  - Heather.krug@state.co.us
- Roger Muse
  - Rmuse@anab.org
- Kathy Knutson
  - drkathyknutson@gmail.com
  - www.linkedin.com/in/kathyknutsonphd/

Thanks Michael Wood for organizing this group again this year!
